

SEMINAR

Animal Molecular & Cellular Biology Graduate Program

FALL, 2013 SCHEDULE

All seminars are in Rm 102 Animal Sciences Bldg (Bldg 459)

Date	Speaker	Affiliation	Topic
September 6, 12:30 PM	Arthur S. Edison	Dept. of Biochem. & Molecular Biology	Metabolomics from worms to humans
September 13, 12:00 PM	Maria Christina Vasquez	Dept. of Biology	Multiple stressors from the environment to development
September 27, 12:00 PM	Alberto Riva	Dept. of Molecular Genetics & Microbiology	Bioinformatics for high-throughput biological research
October 11, 12:00 PM	Gabriel Gomes	Dept. of Animal Sciences	Effects of evaporative cooling prepartum and vitamin E supplementation on performance of Holstein cows during summer in Florida
October 25, 12:00 PM	Malcolm Maden	Dept. of Biology	From axolotls to mice: lessons in how to regenerate complex structures
November 8, 12:00 PM	Veronica M. Negron Perez	Dept. of Animal Sciences	Determination of allelic expression of <i>H19</i> in pre- and peri-implantation mouse embryos
