

SEMINAR

Animal Molecular & Cellular Biology Graduate Program

SPRING, 2017 SCHEDULE

Seminars are in Rm 102 Animal Sciences Bldg (Bldg 459) unless otherwise indicated

Date	Speaker	Affiliation	Topic
January 13, 12:00 PM	Mercedes Kweh	Dept. Animal Sciences	Characterizing the immunoregulatory mechanism of the vitamin D signaling pathway
January 27, 12:00 PM	KC Jeong	Dept. Animal Sciences	Genomic Comparison Reveals the Transmission of Extended Spectrum β -lactamase producing <i>Escherichia coli</i> through the Environment rather than Local Occurrence
February 10, 12:00 PM	Chengcheng Li	Dept. Animal Sciences	Impairments in mitochondrial biogenesis and autophagy in skeletal muscle of aged American Quarter Horses
February 24, 12:00 PM	Tom Yang	Dept. Biology	Functions and Mechanisms of the Prader-Willi Syndrome Imprinting Center
March 17, 12:00 PM	Sergei Tevosian	Department of Physiological Sciences	GATA proteins control steroidogenic development in mice
March 31, 12:00 PM	Dominick Lemas	Dept. of Health Outcomes and Policy	Human milk metabolomics and microbe-host interactions associated with pediatric obesity
April 14, 12:00 PM	Mariola Edelmann	Department of Physiological Sciences	Exploring host-pathogen interactions through omics technologies
