

SEMINAR

Animal Molecular & Cellular Biology Graduate Program

Spring, 2018 SCHEDULE

Seminars are in Rm 102 Animal Sciences Bldg (Bldg 459) unless otherwise indicated

Date	Speaker	Affiliation	Topic
January 19, 12:00	Cheng Ye	Dept. Animal Sciences	The role of CD70 in T cell development with implications for autoimmune diabetes
February 2, 12:00	Peter Hansen	Dept. Animal Sciences	Preimplantation Causes of Postimplantation Conceptus Loss in Cattle
February 16, 12:00	Robert McKenna	Dept. Biochemistry and Molecular Biology	Structural Studies of Carbonic Anhydrase: mechanism, Drug Design, and Industrial Applications
March 2, 12:00 PM	Robin da Silva	Dept. Food Science and Human Nutrition	The role of methionine metabolism in NAFLD and NASH
March 16, 12:00 PM	Amy Skibiell	Dept. Animal Sciences	Epigenetic effects of in utero exposure to heat stress on the liver and mammary gland of cattle
March 30, 12:00 PM	Shannon Wallet	Dept. Oral Biology	The Epithelial Cell's Contribution to Shaping Innate and Adaptive Immune Responses: From Autoimmunity to Cancer
April 13, 12:00 PM	Guan Yang	Dept. Animal Sciences	Deciphering pig iNKT cells and their contribution to swine influenza immunity
