

Remember:

- ✓ More prescribed fire means less wildfire.
- ✓ Prescribed fire is a safe way to apply a natural process, to ensure ecosystem health and reduce wildfire risk.

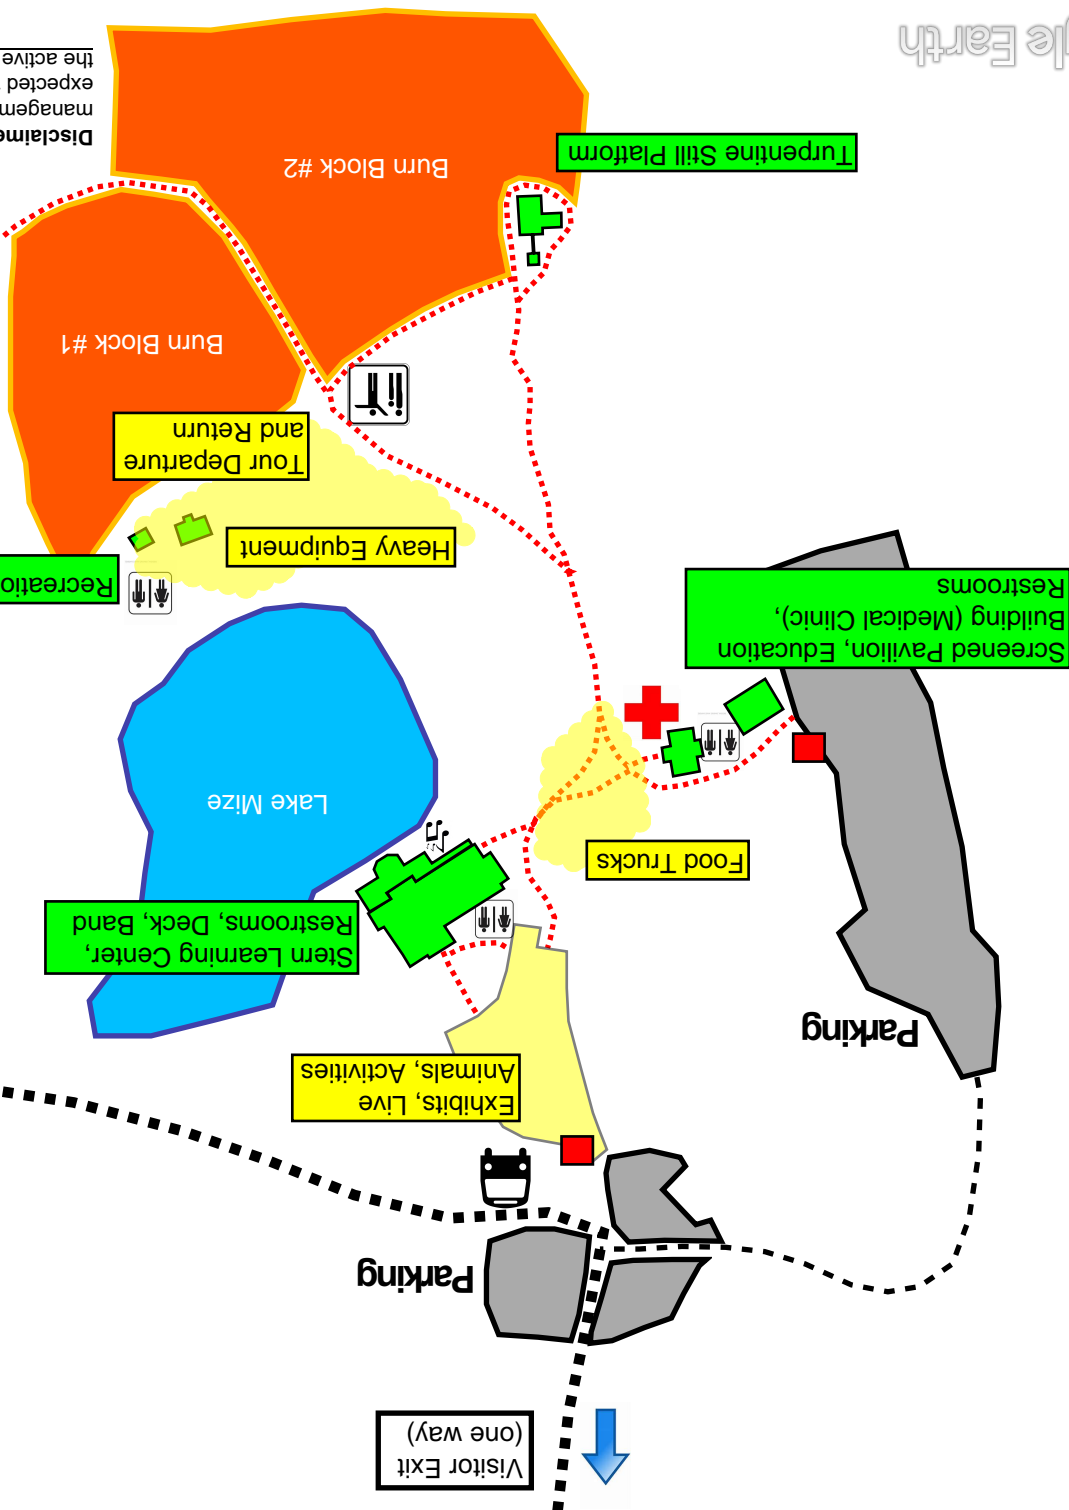

Welcome! This guide will help you make the most of your time today. Need assistance? The people wearing yellow Nomex jackets are here to help.

Have fun and stay safe!

700 ft

Disclaimer: While prescribed burning is generally a safe, effective tool in land management, **visitors with breathing issues**, or other issues reasonably expected from being in the vicinity of active fire, should avoid the areas surrounding the active prescribed burns.
