

UF/IFAS Industrial Hemp Partner Farms

Coordinated On-farm Trial

The University of Florida Institute of Food and Agricultural Sciences (UF/IFAS) Industrial Hemp Pilot Project aims to support the future viability and sustainability of the hemp industry through assessment of the crop, cropping systems, and their ecological and economic impacts. This project is operational at multiple research facilities across Florida, representing a broad range of research disciplines and goals.

In the second year of the project, on-farm trials have begun, with partner farms chosen to expand understanding of hemp cultivation in a variety of locations and conditions. The farms listed here are approved and permitted project partners.
